

A STATEMENT OF PURPOSE

EnviroKinecs, Inc. (EKI) is excited to enrich our clients and stakeholders with the wealth of knowledge, perspectives, and expertise we have built over the past 40 years. We have engaged in policy, planning, development, management and public engagement services linked to environmental sustainability.

EKI takes great pleasure to note that we have excelled at social equity and public engagement. We have an intimate understanding of the upcoming transportation/infrastructure/energy projects, and special provisions - based on our multi-level relationships with stakeholders. Given the opportunity, we shall infuse our commitment to the community into our work.

Some of our unique benefits are that we bring local experience to our respective clients, and keenness to create community-based plans/projects to reflect a shared vision of sustainable communities. Our comprehensive package of strategic solutions is premised on interconnectivity of projects with adjacent neighborhoods, churches, schools, parks and other destinations.

Simply, this is what we do. We have experience. We bring this expertise to your side of the table.

James A. Mosley

President, EnviroKinecs, Inc.
